**The City of Cedar Park remains in Stage 3 Water Conservation Measures**  
*Will not be impacted by BCRUA Underwater Pipeline Replacement Project*

The City of Cedar Park will remain in the current Stage 3, one-day-per-week outdoor watering restrictions while the Brushy Creek Regional Utility Authority (BCRUA) contractors replace 1,400 feet of underwater pipeline.

The BCRUA is a secondary source of water, and the City's water plant has the capacity to continue to provide a secure and safe water supply to our customers throughout the estimated replacement project timeframe.

The City remains in Stage 3 water restrictions due to the ongoing drought conditions. We wish to thank all our customers for their diligence in adhering to the one-day-per-week outdoor watering restrictions and encourage you to continue your efforts.
