- Other: $304,748

FY 2018: $498,305
FY 2017: $301,821
FY 2014: $38,559
Investment Strategy

• Use a laddered approach that matches liabilities and maturities

• Regularly review:
  • Cash flow model (maturities, tax revenues vs payments)
  • Types of investments

• Monitor changing market conditions
  • Currently short-term rates are higher than long term rates (inverted yield curve)
  • Evaluate stability of the markets

• Today’s portfolio is well positioned to take advantage of opportunities
Increasing the WAM will help us to close the gap
Maturities Ladder
Investments by Type

Investment Balances by Type
(Last Six Quarters)

End of Quarter Portfolio Balance: $203M
In Summary

• $17.3M increase in portfolio since beginning of FY (property tax collections – first quarter)
  • Influx of cash reduces WAM

• Economic conditions flatten the yield curve
  • US economy – full employment, increased personal income and spending, however;
  • Global economy – slow down, affected by trade concerns and politics

• We’ll increase the WAM to increase yield and hedge possible reduction in rates

• Maintain portfolio in compliance with Public Funds Investment Act and City’s Investment Policy
• Quarterly investment reports are available on our web site
