

NEW! RIVIERA SPRINGS EMERGENCY ACCESS

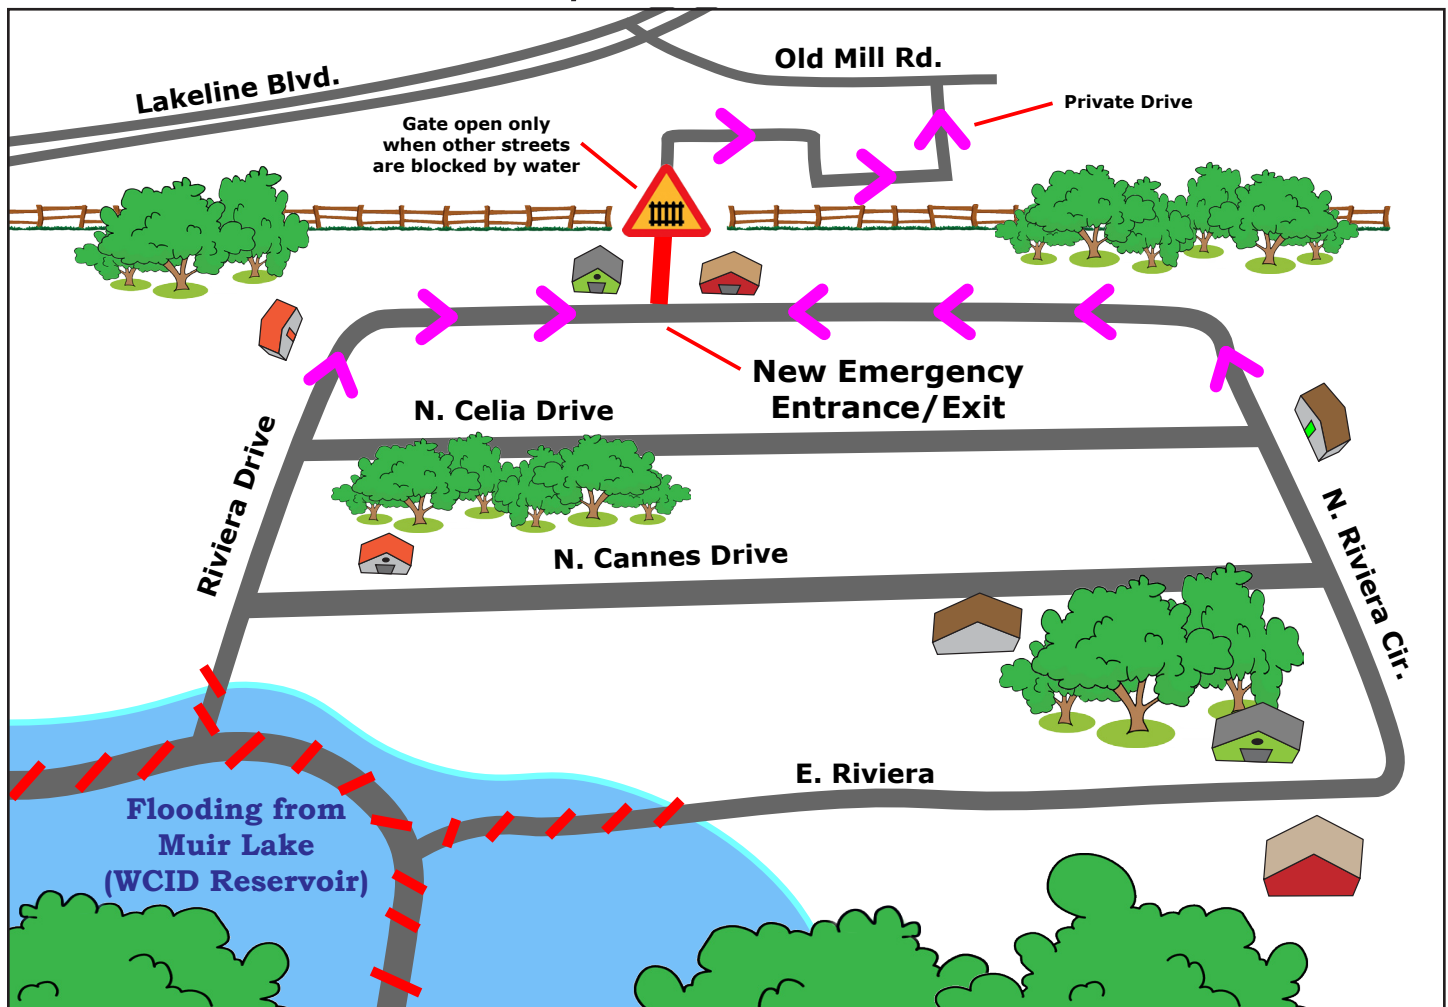

The problem: As you may recall during 2010 there was a major tropical storm that resulted in flooding of Riviera and E. Riviera Drives from Muir Lake (WCID Reservoir). This limited access for residents along W. Riviera, N. Celia, N. Cannes, E. Riviera and Riviera Drives.

The solution: The City of Cedar Park worked out an agreement with the developer of the Arbors at Lakeline so that we may provide emergency access to Riviera Springs residents during times of flooding, by way of a connecting street through a City-owned lot at 2207 W. Riviera Springs Drive. The streets in the Arbors at Lakeline, however, are private drives, so we installed a metal gate that will **be open only if Riviera and E. Riviera Drives are flooded.**

The timeline: It was completed in spring of 2017.

The route: The arrows at the top portion of the map indicate the streets you will take to enter or exit your neighborhood **only when the gate is open - if Riviera and E. Riviera are flooded.**

IF GATE IS OPEN, PLEASE USE THIS ROUTE:
